

Figure 1. A schematic diagram illustrating the experimental design. The figure shows a sequence of events from left to right. It begins with a box labeled "Stimulus presentation". This leads to a box labeled "Response selection", which contains two options: "Correct response" and "Incorrect response". From "Correct response", the path goes down to a box labeled "Feedback". From "Incorrect response", the path goes down to a box labeled "No feedback". Both "Feedback" and "No feedback" lead to a box labeled "Inter-trial interval". Finally, both paths converge into a box labeled "Next trial".
